

CITY OF NEDERLAND

PUBLIC NOTICE –

HURRICANE LAURA DEBRIS

After the storm, City crews removed limbs and branches from our roads to facilitate road access; crews will be continuing to remove these piles. It is necessary for homeowners to place their debris in separate piles as follows:

1. **Green Waste** (limbs, tree branches, logs, leaves, and vegetation);
2. **Debris** (lumber, siding, shingles);

The City recognizes the inconvenience and additional work this separation of debris requires, but the piles have separate end locations. City crews will be focusing on the collection of debris from Hurricane Laura for the next several days and will be working longer shifts. Do not place the debris in ditches or over water meters and fire hydrants.

We ask for your cooperation and patience through this process. If you have any questions about debris separation or placement, please call the City Manager's Office at (409) 723-1503.
